

# BTC

## Battery Terminal Cleaner and Protector

Acid Indicator

Cleans & Protects

Increases Power Output

Extends Battery Life

**BTC** is a battery terminal cleaner and protector that contains an indicator dye for detecting acid. It cleans and protects in one step.

**BTC** neutralizes acid and corrosion buildup on battery terminals and leaves a coating to resist future corrosion. Removing this buildup will increase power output and extend battery life.

When **BTC** is sprayed on the terminals, the light yellow foam will turn red if there is any acid present. Just rinse and reapply until the foam stays light yellow, then allow the foam to dry and form a protective coating.
